

CV of Prof. Nguyen Thi Kim Oanh

NAME : NGUYEN THI KIM OANH (Mrs.)

POSITION: Distinguished Professor
Emeritus Professor
Director of the Center for Nexus of Air Quality, Health, Ecosystem and Climate

ADDRESS: Environmental Engineering and Management (EEM)
Asian Institute of Technology (AIT)
Klongluang, Pathumthani 12120, Thailand.
Phone 662 524 5641; Fax 662 524 5625
Email: kimoanh@ait.ac.th; kimoanh@ait.asia

AREAS OF SPECIALIZATION: Air pollution data system (Emission Inventory, Modelling, Monitoring, Exposure Assessment); Biomass open burning; PM_{2.5} and ozone air quality management; Short-lived climate pollutants; Co-benefit assessment; Air pollution meteorology; Monitoring and control of persistent organic pollutants; Industrial pollution management.

LANGUAGES AND DEGREE OF PROFICIENCY: English (very good), Russian (very good), Vietnamese (excellent)

EDUCATION

5/1991-4/1994: Dr. Eng., Environmental Engineering and Management (EEM),
School of Environment, Resources and Development (SERD), AIT,
Thailand
9/1989-4/1991: M. Eng., EEM/SERD, AIT, Thailand (Graduation Prize)
9/1973-9/1978: Dipl. Eng., Meteorology
Odessa Hydrometeorology Institute, Ukraine
First class with Distinction (GPA = 5.0/5.0), First Honours
9/1969-6/1972: Mathematics-gifted high school, Vietnam
9/1962-6/1969: Primary and secondary school, Vietnam

OUTLINE OF RELEVANT EXPERIENCE

Prof. Nguyen Thi Kim Oanh, a distinguished professor and the founding director of the Center for Nexus of Air Quality, Health, Ecosystem and Climate, at the Asian Institute of Technology (AIT). She has over 35 years of working experience in research, education, consultancy, and capacity building. She is internationally recognized for her work on air pollution and climate in Asia with a focus on the ASEAN countries. She has been recognized in the top 2% globally most cited scientists in the field of “Meteorology and Atmospheric Sciences” in 2021.

Throughout her career she has spent untiring efforts to provide a better characterization of air pollution issues in Asian developing countries through field measurements, emission inventory, and modeling studies at urban, national, and regional scales. She has published 2 books (ed.), 130+ peer-reviewed scientific papers, 50 book chapters, and over 60 important development reports.

Under her advisership, as of 2024, there are 150+ Master's and 17 Ph D AIT graduates who are now working in Asia and beyond.

With her extensive experience and professional networking capacity she has conducted, as PI or Co-PI, over 60 regional collaboration research projects. She has conducted, in the capacity of a team leader, several consultancy projects for ADB, WB, CAA, USAID, Deloitte, etc. Her sabbaticals at the University of Washington in Seattle, and the University of Illinois at Urbana-Champaign, USA (2004), and the Institute for Advanced Sustainability Studies in Germany (2012) have further extended her research networks.

Professor Kim Oanh has worked closely with government agencies and international organizations to provide science-based recommendations to improve environmental quality. Her research has a significant impact on environmental policy and public health in the region and has been credited with international awards and recognition.

EMPLOYMENT HISTORY

2009-Present: Professor, Environmental Engineering and Management (EEM), AIT

1997- 2009: Assistant Professor and Associate Professor, EEM, AIT

1996-1997: Coordinator of AIT-SIDA Environment Programme

1994-1997: Research Specialist and Co-PI of the AIT-SIDA Environment Programme

1979-1989: Lecturer at the Faculty of Meteorology, Vietnam National University, Hanoi, Vietnam

OTHER POSITIONS

Jan 2015-2021: Adjunct Professor, Ton Duc Thang University, Vietnam

7/2013-9/2012: Sabbaticals (visiting professor) at the Institute of Advanced Sustainability Studies (IASS), Potsdam, Germany.

8/2000-12/2008: Visiting faculty, Faculty of Environmental Sciences, Hanoi University of Science, Vietnam National University, Hanoi, Vietnam - duties involved: deliver special lectures for graduate and undergraduate courses.

2/2004-5/2004: Sabbaticals (Fogarty visiting scholar), Department of Environmental and Occupational Health Sciences (DEOHS), University of Washington, Seattle, WA, USA)

5/2004-7/2004: Sabbaticals (visiting scholar), at Department of Civil and Environmental Engineering, University of Illinois at Urbana-Champaign (UIUC), Illinois, USA

5/2004-7/2004: Short-term consultant at World Bank Institute, Washington DC, USA

SELECTED HONOURS AND APPOINTMENTS

- Has been recognized in the top 2% globally most cited scientists in 2021 in the field of “Meteorology and Atmospheric Sciences”.
- Current member of the Science Panel of the Asia Pacific Clean Air Partnership (APCAP).
- Current member of the working group WMO-GAW-ACRH
- Founding member and past Co-chair of IGAC-MANGO (IGAC Monsoon Asia & Oceania Networking Group).
- Past member of the Scientific Steering Committee of the IGAC; an expert member of the guideline development group of the WHO Global Air Quality Guidelines (2021); a vice-chair of 2011 UNEP-WMO “Integrated Assessment of Black Carbon and Tropospheric Ozone”; a coordinating lead author of “UNEP Regional Assessment Report on Atmospheric Pollution in the Asia Pacific” (2019).

Prof. Kim Oanh received many awards and prizes, including two teaching awards at AIT, several best paper awards, the “*Distinguished Researcher Awards for Senior Research Leader*” by AIT, “*EXTRA MILE*” by the Better Air Quality 2008 (BAQ08). Seven (7) doctoral and 17 master thesis advisees under her supervision received student paper awards in the student paper competition

organized yearly by the West Coast Section, Air & Waste Management Association, USA, since 2001.

SELECTED RELEVANT RESEARCH PROJECTS

Prof. Kim Oanh handles/handled over 60 research projects at AIT in the capacity of PI or Co-PI of which 20 are/were regional collaboration projects. She is also the team leader of a number of consultancy projects on the topic of air quality management in Asia. Some are listed below:

- 1) CCAC funded “Deliver training programme for the implementation of decrees for reducing open waste burning and air pollution in Cambodia”, AIT team leader, 2025-2027.
- 2) Wellcome Trust funded project “Climate Attribution of Wildfire Smoke Impacts on Priority Population Health in Southeast Asia and Australia (CLEAR-HEALTH).”, AIT team leader, 2025-2028.
- 3) e-ASIA joint project “Climate change adaptation to smoke haze for improved child health in Southeast Asia”, AIT team leader, 2025-2027.
- 4) USAID-Nepal funded “*Swachchha Hawa*” – a five-year program which aims to improve air quality in the Kathmandu Valley”, PI of AIT subproject focusing on “Development of comprehensive air quality data system and capacity building”. 2022-2026.
- 5) AFD sponsored “Air quality improvement program in Thailand – AQIP”. The project aims to provide program management and transversal technical advisory, support to develop activities led by Pollution Control Department (PCD) of Ministry of Natural Resource and Environment (MoNRE), support to develop activities led by Office of Transport and Traffic Policy and planning (OTP) of Ministry of Transport (MoT), and support to develop activities led by Chiang Mai Municipalities & Province. The project is coordinated by Egis with three consortium partners including AIT, Citepa, and AirParif. The AIT team is responsible for the data theme (emission inventory), and capacity building program for the Thai government. PI of the AIT sub-project.
- 6) CAA funded project “Development of air quality management for Hanoi, Vietnam”, lead international expert. 2023.
- 7) UNEP funded "Enhancing and scaling up the joint AIT and UNEP's efforts for air quality management" project. The project aims to enhance and scale up the joint AIT and UNEP's efforts for air quality management at the global, regional, and national levels, through the engagement of the private sector, finance, and the donor community. 2023. Co-PI.
- 8) SEI-SUMERNET (Sida) funded project “*Atmospheric deposition to large river basins and potential effects on the water environment; DEPOSITION*”. Partners: Royal University of Phnom Penh, Cambodia and Nong Lam University (NLU), Ho Chi Minh City, Vietnam. The project conducts emission inventory for air pollutants and GHGs from Greater Mekong Countries and assesses multiple benefits of the air emission reduction to the river water quality, ecosystems, air quality and climate. 2020-2023. PI of the regional project.
- 9) UNEP ROAP funded project “Clean Air Solutions Tracker with focus on Child-centered Solutions”. Objectives: i) identify and promote child-centered clean air solutions and strengthen implementation uptake of the clean air measures and ii) analyze the current and potential implementation of UNEP recommended 25 clean air measures in Vietnam. 2020-2021. PI of the AIT sub-project.
- 10) WB funded “*Air Quality Management in Vietnam: Emission inventory*”. 2020-2021. Team leader.
- 11) PCD (Thailand) funded PM_{2.5} research project “*Development of web-based emission inventory for major emission sources of PM_{2.5} in Thailand*”. 2020. PI.
- 12) PCD (Thailand) funded PM_{2.5} research project “*Development of Sector Segregated and Trackable PM_{2.5} Emission Database for Bangkok*” (PCD-PM_{2.5}). 2019. PI.

- 13) JICA – PM gaseous substances and precipitation measurement (2015-2018). A Study on Urban Air Pollution Improvement in Asia. Sponsored by Japan International Cooperation Agency. PI,
- 14) UNEP “*Emission inventory for waterway transport in Bangkok, Thailand*”, 2019-2020. Co-PI.
- 15) EU funded project “*MONTUS- Master on New Technologies Using Services: BigData/CloudComputing for Environmental Data*”. Partners from Europe (France, Italy, Belgium) and Southeast Asia (Thailand, Vietnam and Cambodia). 2018-202. PI of AIT team.
- 16) United States Agency for International Development (USAID) funded PEER project “*Assessment of impacts of the emission reduction measures of short-lived climate forcers on air quality and climate in Southeast Asia*”. 2012-2016. PI.
- 17) Swedish SIDA funded “*Asian Regional Air Pollution Research Network for Improvement of Air Quality in Asian Developing Countries*” phase 1 and phase 2: 2001-2010. PI.
- 18) GIZ-Phnom Penh Emission Inventory (2014-2015). *Elaboration of Emission Inventory for Phnom Penh, Cambodia*. Sponsored by German International Cooperation. PI.
- 19) AIT-PTT (2012-2015). *Study of Ground-level Ozone in Bangkok Metropolitan Region by Advance Mathematical Modeling for Air Quality Management*. Sponsored by PTT Public Company Limited. PI, 1,797,600 THB
- 20) AIT-France (2010-2014). *Assessment of co-benefits on air quality and climate resulted from various control strategies in Southeast Asia*. Sponsored by SDCC / AIT - France Network. PI, 30,000 Euros.
- 21) AIT-RTG (2009-2010). “*Air Quality and Climate Impacts of Switching to Natural Gas-Fueled Public Transportation Vehicles in Bangkok*”. PI, in cooperation with Dr. Rattapon Onchang, Silpakorn University. 850,000 Bath.
- 22) UNEP funded “*Emission inventory for Atmospheric Brown Cloud in Asia*”, 2008-2009. Co-PI.
- 23) AIT-SINTEF phase 1 (2006-2009) and phase 2 (2012-2014). *Capacity Strengthening on Hazardous Chemicals Management*. PI, in collaboration with Prof. Chongrak P. and SINTEF expert. Sponsored by NORAD. Total budget 840,000 USD.
- 24) ARRPET, phase 1 (2001-2004) and phase 2 (2004-2010). *Asian Regional Air Pollution Research Network for Improvement of Air Quality in Asian Developing Countries*, a component of the Asian Regional Research Programme on Environmental Technology. Sponsored by Sida, PI, in cooperation with Prof. Polprasert (Co-PI). Total budget for the air pollution project: 5,700,000 + 7,500,000 SEK.
- 25) ADEME-AIT (2004-2007). *Photochemical Smog Modeling for Tropical Region*, a research collaboration project with the Laboratoire de Meteorologie Dynamique - Ecole Polytechnique, Paris. PI, 12,000 Euros.

STUDENT RESEARCH SUPERVISION

In total, she was the advisor to over 150 master's graduates and 17 Ph.D. graduates; the field advisor to 13 master/Ph D exchange students from Europe; advisor to over 30 special studies; a committee member for other 30 Ph.D. and over 160 students from EEM, Energy, UEM, WEM and other study fields in AIT. Currently, she supervises, as the co-advisor, 3 Ph.D. and several master's students of EEM at AIT.

DOCTORAL GRADUATE SUPERVISED AND PUBLICATIONS (17 graduates)

- 1) Nguyen Nhat Ha Chi “Integrated assessment of impacts of emission reduction on ambient air quality and acid deposition fluxes in Greater Mekong Subregion”. Graduated in December 2024. Co-chair with Dr. Ekbordin.
- 2) Lai Nguyen Huy “Development of Attested Readily Publicized Air Pollution Emission

Nguyen Thi Kim Oanh, February 2025

- Inventories Database for Southeast Asia Region”. Graduated in August 2021. Co-chair with Dr. Ekbordin.
- 3) Kok Sothea “Development of Integrated Approach to Assess and Prioritize the Emission Reduction Measures of Air Pollution: A Case in Urban Area of Phnom Penh, Cambodia”. graduated in May 2019.
 - 4) Nguyen Hong Phuc “Development of Framework for Assessment of Human Health Effects from Traffic Air Pollution in Urban Area”, graduated in Dec 2018.
 - 5) Ngo Thanh Danh “Assessing Impact of Surface Ozone Exposure on Major Crops Production in Southern Vietnam and Mitigation Strategies”, Graduated May 2017.
 - 6) Aishajiang Aili “Sand-Dust Storm Patterns in Northeast Edge of Taklimakan Desert in relation to the meteorology and development processes”, Graduated May 2016.
 - 7) Nguyen Duy Binh “Treatment for soil contaminated with dioxin using nano-assisted photodegradation and biological technologies”. Graduated May 2014.
 - 8) Muhammad Zeeshan Ali Khan “Improvement of satellite monitoring for ground particulate matter pollution using synoptic climatological classification”. Graduated Dec. 2013.
 - 9) Didin Agustian Permadi “Co-benefit study of black carbon emission reduction on climate and air quality in Asia”. Graduated in Dec. 2013.
 - 10) Thipsakorn Khumsaeng “Assessment of stockpile POPs destruction technologies by Life Cycle Analysis”. Graduated in May 2013. 1 paper published.
 - 11) Amornpon Changsuphan “Application of Nanoscale Metallic Particles for Removal of VOCs in Contaminated Air”. Graduated in Dec. 2012.
 - 12) Thongchai Kanabkaew “Effects of Biomass Open Burning on Atmospheric Aerosols and Climate Conditions”. Graduated in Dec. 2011. 5 years.
 - 13) Prapat Pentawan “Indoor-Outdoor Levels and Fate of Persistent Organic Air Pollutants and Associated Health Risks”. Graduated in Dec. 2008; 4 years. 2 papers.
 - 14) Aungsiri Klinmalee “Development of Assessment Method for Exposure to Open Rice Straw Burning Emission”. Graduated in August 2008.
 - 15) Le Hoang Nghiem “Photochemical Smog Modeling for Simulation of Ground-Level Ozone over the Continental Southeast Asian Region to Assess Potential Impacts on Rice Crop”. Graduated in 2008.
 - 16) Prapat Pongkiatkul “Development of Hybrid Receptor Models for Air Pollutions Source Apportionment Study”. Graduated Dec. 2006.
 - 17) Zhang Bao Ninh “Photochemical Smog Modeling for Air Quality Management of Bangkok Metropolitan Region”. Graduated in 2002.

PUBLICATIONS

She has published 2 books (ed), 12 monographs, 50+ book chapters; 130+ peer-reviewed papers in international refereed journals; 40 papers in peer-reviewed international conference proceedings; 10 papers in international workshop proceedings; 100+ abstracts in international workshops and conferences; 7 non-referred research papers; over 60+ project reports; and delivered above 100 keynote/invited speeches. (Publication list: https://www.researchgate.net/profile/Nguyen_Thi_Oanh).

Books:

- 1) **Integrated air quality management: Asian Case Studies.** Kim Oanh N. T. (ed). 2012. ISBN 9781439862254. CRC Press. 440 p. (www.crcpress.com/product/isbn/9781439862254)
- 2) **Improving Air Quality in Asian Developing Countries: Compilation of research findings.** Kim Oanh N. T. (ed). 2014. ISBN: 9786049044106. NARENCA. 435 p.

Selected journal papers:

ABILITY TO COOPERATE

Prof. Kim Oanh has a wide cooperation network worldwide. She has close cooperation with colleagues from the AWMA (US), top-ranking universities and organizations in the US (Clarkson

university, EWC, MIT, UW Seattle, UI Urbana-Champaign, UC Berkeley, UC Davis, US EPA, CARB, DRI, Emory University), in Europe (Swedish Stockholm, Umea and Boras University; French Paris Polytechnique, La Rochelle; Danish NERI; Norway SINTEF, UK University of York, Italy University of Ferrara, etc.), in Asia (Tokyo university, IGES, KIST, NUS of Singapore and SINICA of Taiwan, and many universities in Southeast Asia countries), international organizations of World Bank Institute, WHO, UNEP, UNICEF, SEI, JICA RI, GIZ, USAID, among others. New research ideas and research projects have been brought in by these professional networks, which help build up cutting-edge research quality and places her work in the global map of air quality research. She is working closely with government agencies in SEA with a capacity-building focus for the development of clean air action plans from the national to provincial levels.

CERTIFICATION: I, the undersigned, certify that, to the best of my knowledge and belief, these biodata correctly describe myself, my qualifications and my experience. I understand that any wilful misstatement described herein may lead to my disqualification.
